

Project Demo Planning

Date	2 July 2026
Team ID	XXXXXX
Project Name	Rising Waters
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Project motivation and objectives	2	Member 1
2	Solution Overview	Architecture and workflow	2	Member 2
3	Dataset & ML Model	Preprocessing, training and prediction	3	Member 3
4	Live Demonstration	Predict flood risk using sample data	4	Member 4
5	Results	Accuracy and performance metrics	2	Member 5
6	Q&A	Answer evaluator questions	2	All Member

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Introduce the team and project. Explain the impact of floods, challenges in early prediction, and the need for an AI-based flood prediction system.
2	Solution Overview	Explain how Rising Waters uses historical rainfall, water level, and weather data with Machine Learning to predict flood risk and provide early warnings.
3	Live Feature Demonstration	Demonstrate data input, model prediction, flood risk output (Low/Medium/High), graphs, and visualization of prediction results.
4	Q&A Session	Answer questions about the project, dataset, ML algorithm, prediction accuracy, future enhancements, and real-world applications.
