

Solution Architecture

Date	2 July 2026
Team ID	XXXXXX
Project Name	Rising Waters
Maximum Marks	5 Marks

Solution Architecture Diagram:

Provide a high-level visual representation of your solution's architecture. Use the structural layout below as a template to map out your Presentation Layer, Application Layer, and Data Layer. Fill in the specific technologies and components for your project directly into the boxes to create your architectural diagram.

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
<i>[Presentation Layer]</i>	<i>Provides the user interface where users enter rainfall, temperature, humidity, and other values to predict floods.</i>	<i>HTML, CSS, JavaScript, Flask</i>
<i>[API Gateway]</i>	<i>Handles client requests and forwards them to the prediction engine</i>	<i>Flask</i>
<i>[Microservices]</i>	<i>Processes user input, performs data preprocessing, runs the trained ML model, and predicts flood risk.</i>	<i>Python, Scikit-learn, Pandas, NumPy</i>
<i>[Database]</i>	<i>Stores datasets and trained machine learning models used for prediction.</i>	<i>CSV, SQLite, Pickle</i>
