

Coding & Solution

Date	2 July 2026
Team ID	xxxxxx
Project Name	Rising Waters
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	https://github.com/mythricg2005-source/Raising-Water
Programming Language(s)	Python, HTML, CSS, JavaScript
Framework(s) Used	Pandas, Numpy
Key Features Implemented	Prediction history, Report generation
Pending / Incomplete Features	SMS Alert System, Real-time IoT sensor integration
Setup / Run Instructions	Install Python 3.10+

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

The project follows modular coding practices using Flask for backend development and Scikit-learn for machine learning. The application is organized into separate modules for preprocessing, prediction, and user interface to improve maintainability and scalability.
