

Empathy Map

Date	2 July 2026
Team ID	xxxxxxx
Project Name	Rising Waters
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • "Will my village flood today?" • "I need an early warning." • "I don't want to lose my crops."	THINKS • How can I protect my family? • Is this prediction accurate? • Should I evacuate now?
DOES • Checks weather reports • Watches news channels • Monitors rainfall	FEELS • Worried during heavy rains • Fear of property damage • Hopeful after receiving early alerts
